Hygienic and Infection Prevention Concept for workshops „Intercultural Communication“ in the frame of the Resident Tutor program

This hygienic concept applies to the Resident tutor program and its associated workshops „Intercultural Communication“ for tutors in the students’ halls of residence, held in rooms of the Studentenwerk München in physical presence. Upon request, the hygiene concept will be presented to the administration in charge.

This hygienic concept applies as long as the Bavarian so called „Krankenhaus-Ampel“ (Clinical Traffic Lights) have turned green. If there are changes, the hygienic concept will be adapted following the actual valid regulation orders in force. This actual concept was made on the basis of the „14. Bayerische Infektionsschutzmaßnahmenverordnung“ („14. BayIfSMV“; 14th Bavarian Infection Prevention Concept Order).

General rules:

Information regarding current precautions and behavioural rules shall be passed on orally as well as in the announcement of the event/ when registering.

1) The so-called "3G rule" (vaccinated, tested, recovered) applies to all events that take place in person, according to the definitions of the COVID-19-Schutzmaßnahmen-Ausnahmeverordnung (COVID-19 Protection Measurements Orders „SchAusnahmV“, §2, no. 2, 4, 6). A person who has been vaccinated with a vaccine other than those listed by the Paul Ehrlich Institute on the Internet at http://www.pei.de/impfstoffe/covid-19, must bring a written or electronical test confirmation of negative result (rapid test: max. 24 hours old; PCR test: max. 48 hours old).

2) Anyone who is in a quarantine by authorities’ orders, who has unspecific general symptoms and/or COVID related or respiratory symptoms (like fever, coughing, a cold, rheumatic pains, headache, etc.) as well as anyone who has been in contact with cases of COVID-19 within the last 14 days, is not allowed to participate.

3) General rules regarding infection prevention (coughing and sneezing into one’s elbow, thorough and regular hand hygiene, keeping the minimum distance as well as avoiding physical contact) are to be observed.

4) A minimum distance of 1.5 metres has to be kept from one another. Should this not be possible, participants are required to wear a medical face covering (according to the 14. BayIfSMV).

5) Hygienic Gel will be provided for the workshop time, and the room will be aired regularly.

The group leaders are in charge of making sure everyone keeps to the „3G-Rule“ and the other rules during the event.

One can only take part in the event after having registered for it. At the moment, the number of participants is limited for the event.

With their registration, all participants agree to this hygienic concept.

People who are not registered are not allowed to take part in the event. People who are not prepared to keep to the rules should not be allowed to participate in the event, in accordance with domiciliary rights. Physical contact among the participants is to be avoided or should be kept to a minimum between the participants and the group leaders.

Munich, on 21st of October, 2021

Student Union (Studentenwerk) Munich, Resident Tutor Program
